BEFORE

CEMEX's NEW Plan to Restore its Rock Quarry to...

AFTER

We Want to Hear from You!

As you may have heard, CEMEX announced new changes to its currently approved reclamation plan, a plan that details how the Eliot facility's quarry operation will transition to a more natural state when the time comes for material excavation activities to wind down.

This plan, often referred to as a "**Reclamation Plan**," includes beneficial end uses such as pedestrian and bike trails, habitat restoration, agriculture, open space, and a new source of water. What's more, CEMEX can begin the process of restoring the property to a more natural state even as excavation is underway.

Among the major revisions is our decision to abandon plans to resume mining in Lake A. Our plan also calls for restoring the balance of the Eliot facility located between Stanley Boulevard and Isabel Avenue, including Lakes B and J.

While our plan has changed, our goal remains the same: To provide an affordable source of quality construction material for the region and, as the Eliot Facility is retired from operation, restore the property to beneficial uses that will support generations to come.

Thank you for taking the time to learn more about our plan and for participating in a neighborhood survey!

Just fill out the form on the reverse and send it back today!

Return to CEMEX, 1835 Iron Point Road, Ste 180, Folsom, CA 95630-9825

Name: _____

Address: _____

Day Phone: _____ Email: _____

☐ Please email me updates

What aspect of CEMEX's NEW plan appeals to you most? (Number in order of importance)

- ☐ The decision to abandon plans to mine Lake A
- ☐ The investment in community benefits; new water supply, trails, habitat restoration and open space
- ☐ A reliable source of construction material, tax revenue and jobs

Overall

- ☐ Yes, I support CEMEX's NEW plan
- ☐ Don't know/Undecided

Comments:

Community Benefits

No mining in Lake A, located between Isabel Avenue and Vallecitos Road.

Lake A to be transferred to Zone 7 Water Agency at no cost to ratepayers, a new source of water that will take on added importance in times of drought.

Almost three miles of new pedestrian and bike trails.

Major habitat restoration throughout the chain of lakes, and along the Arroyo Del Valle.

Landscaping improvements will improve views from neighboring homes and trails.

Open space and habitat preservation.

Until operations wind down, the balance of the property will remain a source of quality construction aggregate for local homes, businesses and public infrastructure.

A source of quality jobs and local tax revenue.
